Semanan, Kalideres, West Jakarta

IT Professional with more than 4 years of experience in System Integration and Software Quality Assurance, specializing in the development, integration, and quality improvement of application systems within the banking, financial, and insurance industries. Experienced in designing, implementing, and maintaining complex system integration solutions at PT Bank Mandiri, as well as supporting Core Banking System operations at PT Bank Syariah Indonesia using Temenos T24. Also experienced in supporting system development and testing in the insurance industry, including business process validation, API integration, and ensuring system quality aligns with business requirements and regulatory standards.
Skilled in manual and automation testing, test scenario and test case development, API validation, as well as defect identification and resolution to ensure systems operate optimally, securely, and in accordance with quality standards. Possesses strong analytical skills, experienced in collaborating with cross-functional teams, and proficient in requirement analysis, system validation, technical documentation, project support, and system maintenance to ensure technology solutions align with business objectives and deliver optimal user experience.

Work Experience

IFG LIFE - Jakarta — Nov 2025 - Present

Quality Assurance - Policy Admin Service

- Conduct requirement analysis and create test scenarios and test cases based on business and technical requirements.
- Perform system testing, including functional testing, integration testing, and regression testing for core insurance applications.
- Validate APIs using tools such as Postman to ensure smooth integration between systems.
- Collaborate with developers, business analysts, and stakeholders during SIT (System Integration Testing) and UAT (User Acceptance Testing) processes.
- Verify data in databases using SQL queries to ensure consistency between API responses and database records.
- Perform database data patching for testing purposes and data corrections in specific environments in accordance with established procedures.
- Support deployment activities and ensure there are no critical defects in the production environment.
- Prepare testing reports and provide improvement recommendations to enhance system quality.

BANK SYARIAH INDONESIA - Jakarta — Mar 2025 - Oct 2025

Software Quality Assurance - Core Banking System – Temenos T24

- Collaborate with business analysts and developers to understand requirements and user stories for the Branch, Customer, Funding, and Financing modules.
- Develop and maintain manual test cases based on requirement documentation and business scenarios.
- Perform functional testing, integration testing, and regression testing iteratively within Agile sprint cycles.
- Manage defects using Jira, including reporting, tracking, and verifying bug fixes until closure.
- Participate in Agile activities such as daily stand-ups, sprint planning, sprint reviews, and retrospectives with the team.
- Support the User Acceptance Testing (UAT) process by involving end-users and ensuring their feedback is properly addressed.
- Create detailed testing documentation and quality reports at the end of each sprint as a basis for project evaluation.

PT BANK MANDIRI - Jakarta — Feb 2023 - Feb 2025

Integration Analyst - Kopra by Mandiri

- Identifying and analyzing user needs to design and develop systems according to business requirements.
- Acted as a liaison between developers and users to ensure a clear understanding of system requirements.
- Conducted system testing and validation to ensure optimal functionality.
- Provided recommendations for system improvements and updates to enhance efficiency and performance.
- Design, Testing, and Develop and Integration System.
- Responsibility for all or part of a project from requirements analysis to acceptance testing, including scheduling and satisfactory completion.
- Prepared and provided data for Developers, System Integration Testing, User Acceptance Testing, Performance Test, and Automation.
- Troubleshot and resolved Integration Issues, ensuring security, performance, and reliability of solutions.
- Identifying issues from Jira and analyzing those issues, then coordinating with the development team to determine the estimated time for resolution.
- Create documentation related to system development in accordance with the SDLC to FSD, TSD.
- Create Documentation API with Confluence.

PT BANK MANDIRI - Jakarta — Feb 2022 - Feb 2023

Software Quality Assurance Coordinator - Kopra by Mandiri

- Managing the QA Team: Ensuring the QA team works effectively and efficiently in performing software testing tasks.
- Test Planning: Creating a testing schedule, ensuring all testing activities are completed on time, and resources are used optimally.
- Creating Test Cases: Assisting the team in creating and validating test cases, ensuring the test coverage includes functionality, performance, and security in accordance with the FSD.
- Monitoring Test Results: Preparing reports on testing results, tracking bugs, and monitoring the bug fix status by the development team.
- Coordinating Issues Between the Developer and QA Teams: Identifying and communicating critical issues found during testing and ensuring developers resolve those issues.
- Preparing Test Reports: Creating daily testing status reports for SIT and UAT environments.

PT BANK MANDIRI - **Jakarta** Nov 2021 - Feb 2022

Software Quality Assurance - Kopra by Mandiri

- Creating Test Cases: Developing detailed test cases to test each part of the software based on functional and non-functional specifications.
- Documenting Test Scenarios: Developing and documenting test scenarios that describe how the testing is performed and what is being tested.
- Performing Manual Testing: Conducting manual software testing to identify bugs, errors, or issues within the software.
- Functional Testing: Ensuring the application operates as intended, such as verifying that features work as expected.
- Reporting Bugs: Identifying and documenting bugs or issues found during testing using bug reporting tools like Jira.
- Coordinating with the Development Team: Collaborating with developers to explain the issues found and ensuring those issues are fixed.
- Following Up on Fixes: Ensuring that reported bugs have been fixed and retested to verify that the fix was properly implemented.
- Verifying Fixes: Re-testing the software after bug fixes or changes to ensure that the fix did not impact other parts of the application.
- Preparing Testing Documentation: Preparing and managing clear and detailed documentation on the testing process, test results, and bug and fix reports.

Level of education

Nusa Mandiri University - **Jakarta** Sep 2016 - Sep 2020

Bachelor of Informatics Engineering, 3.11/4.00
